PROFILE

Software Engineer with 3+ years of experience developing scalable web applications using React, Next.js, and TypeScript. Recently completed an intensive C# bootcamp at Formulatrix, building REST APIs and full-stack applications with Entity Framework Core and SignalR. Passionate about building maintainable, high-performance software across the frontend and backend.

KEY SKILLS

- **Frontend Technologies:** Micro-frontend, React, Next.js, TypeScript, React Native
- **Backend & Database Technologies:** C#, .NET, ASP.NET Core, Entity Framework Core, MySQL, NoSQL
- **State Management:** Redux, Context API, Zustand
- **Tools & Workflow:** Git, GitHub, BitBucket, GitLab, VS Code, Figma, Jira, Trello
- **Soft Skills:** Cross-team collaboration, problem-solving, code review

EXPERIENCE

Full-time Front-end Developer at PT. Tiga Daya Digital Indonesia (January 2025 – December 2025)

- Developed and maintained core features of a large-scale online auction platform for JBA Indonesia (lelang.jba.co.id) using React, Next.js, TypeScript, Socket.io, TailwindCSS, and Zustand, supporting real-time bidding under high concurrent traffic.
- Architected reusable, responsive UI components optimized for performance and consistency across the platform, reducing duplication and easing long-term maintenance.
- Developed VISION, an admin dashboard with micro-frontend architecture featuring complex data tables, real-time data handling, and full CRUD operations. Create and document modular components using Storybook.
- Integrated REST APIs, implemented efficient data fetching, caching, and error handling strategies.
- Improved frontend architecture to ensure scalability, maintainability, and alignment with business requirements.

Front-end Developer at PT. Bukit Vista Nusantara (July 2022 – August 2024)

- Designed and developed web application interfaces using React, Redux, Context API, Material UI, and TailwindCSS.
- Maintained and improved application performance and stability by fixing critical bugs and optimizing rendering logic.
- Conducted code reviews and supervised interns to maintain code quality and best practices.
- Deployed features to production and collaborated closely with backend, design, and product teams.
- Developed custom features on WordPress websites using PHP.
- Contributed to a small mobile application project using Flutter.

EDUCATION

Diponegoro University (August 2019 – August 2023)

Engineer's Degree, Computer Engineering – GPA: 3.88/4.00

BOOTCAMP

C# & ASP.NET Core Bootcamp at Formulatrix (June 2026 – July 2026)

- Learned C# and backend fundamentals, dependency injection, asynchronous programming, and testing fundamentals.
- Built a Motorcycle Parking Management API using ASP.NET Core, Entity Framework Core, ASP.NET Core Identity, and SQLite.
- Developed LunchSpot, a real-time canteen table monitoring system using YOLO object detector, ASP.NET Core, SignalR, and React.
- Applied SOLID principles and Clean Architecture in backend projects.

CERTIFICATION

- CCNA: Introduction to Networks from Cisco
- Progate: HTML & CSS Course, JavaScript Course, React Course
